PROFESSIONAL SUMMARY

AI Automation Engineer specializing in AI agents, workflow automation, and LLM integrations using OpenAI, Claude, and n8n. Experienced in building scalable automation systems and AI-driven workflows for productivity and business operations.

TECHNICAL SKILLS

AI & Automation	Development	AI Systems & Architecture	Additional Technologies
- OpenAI API - Claude AI - AI Agents - LLM Workflows - Prompt Engineering - n8n Automation - Workflow Automation	- JavaScript - TypeScript - React.js - REST API - Supabase - Git & GitHub	- Automation Pipelines - AI Workflow Engineering - API Integration - Event-Driven Workflows - Intelligent Systems	- Solidity - Smart Contracts - Chakra UI

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Communication
- Collaboration
- Adaptability
- Fast Learning

PROFESSIONAL EXPERIENCE

Freelance AI Automation Engineer

Self-employed | Freelance & Personal Projects

- Developed AI powered automation workflows using n8n, OpenAI API, and LLM integrations.
- Built autonomous AI agents and intelligent systems to improve workflow efficiency and task automation.
- Designed AI-driven automation pipelines for productivity enhancement and operational optimization.
- Integrated multiple AI models, including OpenAI and Claude, into scalable workflow systems.
- Developed practical AI projects such as CV screening automation, OCR processing bots, and AI agent architectures.
- Built modular and maintainable automation systems focused on real world business use cases.

PROJECTS & PORTFOLIO

AI Agent Development

Tech Stack: LLMs, Autonomous Agents, AI Reasoning Systems

- Developed autonomous AI agents capable of task execution and workflow orchestration.
- Explored self-improving and adaptive agent architectures for AI driven automation.
- Built intelligent agent systems focused on decision-making and productivity enhancement.

Featured Repositories

- [AgentAI01](#) →

AI Workflow Automation

Tech Stack: n8n, OpenAI API, Workflow Automation, AI Integration

- Built AI-powered workflow automation systems using n8n and LLM integrations.
- Automated candidate evaluation and screening processes using intelligent workflows.
- Designed scalable automation pipelines to reduce repetitive manual tasks.
